Period for Reply

A SHORTENED STATUTORY PERIOD FOR REPLY IS SET TO EXPIRE 3 MONTH(S) FROM THE MAILING DATE OF THIS COMMUNICATION.

- Extensions of time may be available under the provisions of 37 CFR 1.136(a). In no event, however, may a reply be timely filed after SIX (6) MONTHS from the mailing date of this communication.
- If the period for reply specified above is less than thirty (30) days, a reply within the statutory minimum of thirty (30) days will be considered timely.
- If NO period for reply is specified above, the maximum statutory period will apply and will expire SIX (6) MONTHS from the mailing date of this communication.
- Failure to reply within the set or extended period for reply will, by statute, cause the application to become ABANDONED (35 U.S.C. § 133). Any reply received by the Office later than three months after the mailing date of this communication, even if timely filed, may reduce any earned patent term adjustment. See 37 CFR 1.704(b).

DETAILED ACTION

Claim Objections

Claim 11 is objected to due to procedural steps being included in an apparatus claim.

Claim Rejections - 35 USC § 112

The following is a quotation of the second paragraph of 35 U.S.C. 112:

The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.

Claims 1-10 are rejected under 35 U.S.C. 112, second paragraph, as being indefinite for failing to particularly point out and distinctly claim the subject matter which applicant regards as the invention.

Claims 1 and 5 are unclear due to the protective layer cited as covering the clad and exposing a surface of the clad. It cannot accomplish both.

Claim Rejections - 35 USC § 102

The following is a quotation of the appropriate paragraphs of 35 U.S.C. 102 that form the basis for the rejections under this section made in this Office action:

A person shall be entitled to a patent unless –

(a) the invention was known or used by others in this country, or patented or described in a printed publication in this or a foreign country, before the invention thereof by the applicant for a patent.

Claims 1-16 are rejected under 35 U.S.C. 102(a) as being anticipated by JP 2002202418 A to Tamaoki. Tamaoki teaches a core which is provided as a center of the optical fiber (Fig 1, # 1); a clad which is coaxial with the core and covers the outside of the core (Fig. 1, # 2); a protective layer that is coaxial with the core and the clad, and covers the outside of the clad to expose a tip-side surface of the clad (Fig. 1, #3); and a titanium compound to be attached on a tip portion of the optical fiber (Paragraph 0027). The optical fiber may be a quartz fiber (Paragraph 0022) and the titanium compound attaches on at least an exposed portion of

Art Unit: 3739

the clad (Paragraph 0028). The titanium compound may be titanium oxide (Paragraph 0028). The fiber is disclosed as being used with a laser (optical source) and the tip portion is disclosed as being detachable as it indicated that it be thrown away after use (Paragraph 0026).
